

HOA Management Company . . . it's our service!

August 13, 2015

To whom this may concern,

PDS and our staff have worked on several construction projects with Agustin Belmontez. We have a strong business relationship with him and his team. The most recent completed project he worked on for us was a tenant improvement for our current office location. The project was over 15,000 square feet and was completed in less than three months. We were highly satisfied with the final product.

Our original experience with Mr. Belmontez was approximately nine years ago on another very large tenant improvement project.

We are so impressed that we have continued to use their services on multiple projects for not only the two listed above but also as a preferred vendor for the over one hundred HOA's we manage.

Agustin and his team have always been thorough, professional and timely. We will continue to use them on many future projects. Should you have any questions, feel free to contact me via the information below.

Sincerely,

Lori Rutledge
President
